Networked Energy Services (NES) is the global leader in providing Smart Grid technology for utilities through an efficient, reliable & secure Smart Energy Grid.

What is the NES system?

The NES System offers a unique power line technology that enables grid mapping, automatic topology management, and many more low voltage grid applications. NES has more than 100 existing smart metering / smart grid projects and pilots in more than 25 different countries. We share your vision of enabling the transition to smart sustainable energy.

What is Networked Energy Services?

Introduction Networked Energy Services' (NES) vision is to offer industry leading, high performing, cost effective and sustainable smart grid solutions with our proven and open 3 tier, multi-application platform.

What is nes smart metering?

NES' smart grid technology is used in nearly 40 million smart meters and other smart end devices around the world. NES offers industry leading security built into its three tier Patagonia Platform. The most reliable smart metering solution in the industry, delivering 99.8% daily availability of meter data.

When did NES start?

However, the beginnings of NES go back much further than October 2014. Echelon Corporation was founded in 1988 by A. C. "Mike" Markkula, an original principal in Apple Computer, and led by M. Kenneth Oshman, one of the four founders of Rolm Corporation. Mike Markkula was an angel investor for Apple Computer and also the second CEO of Apple Computer.

What is Enel NES system?

Our NES System builds upon the same core PLC communications technology, data concentrator technology and open standards employed in Enel's Contatore Elettronico project and provides utilities with an extremely cost-effective system that can be deployed quickly to deliver immediate cost savings and operational improvements.
