

Anguilla smart solar box

What is a smart solar box?

The concept developed in Switzerland guarantees the highest quality. A crane brings the pre-assembled system onto the roof. Nobody has to carry modules and heavy stones in wind or heat, which increases employee health. „The SmartSolarBox is ideal for crane sites of wind turbines."

Where is Anguilla located?

Anguilla, a British Overseas Territory in the Eastern Caribbean, comprises a small main island and several offshore islets. The population of Anguilla is 15,000 and most reside in proximity to The Valley. Anguilla has a high solar potential and set a renewable energy mix target of 30% by 2030.

What is Anguilla's energy mix?

Anguilla has a high solar potential and set a renewable energy mix target of 30% by 2030. Presently Anguilla's energy mix is comprised of only 4% renewable energy. Its electrical demand peaks at 16MW and its electricity prices are high relative to the rest of the Caribbean.

Where can the smartsolarbox be installed?

From flat roofs to industrial and crane sites: Our partners have installed the SmartSolarBox at numerous locations around the world. The concept developed in Switzerland guarantees the highest quality. A crane brings the pre-assembled system onto the roof.

How does smartsolarbox work?

With the SmartSolarBox, a team of three can install up to 250 kilowatt of photovoltaics on the roof every day. This saves human and financial resources. You can plan your project with the well-known and proven planning tool in the industry. The software provides you with an assembly plan and parts list for the solar system.
