Typically, a 6KW solar system requires around 20-24 solar panels, depending on the efficiency of the panels. The number of panels needed can vary based on the wattage of each panel. For instance, if you use 300W panels, you would need 20 panels to reach 6KW.

Customers who have systems in excess of 5KW will be governed under the "Buy all, sell all" net billing system. The Customer pays the Utility, at the published tariff rate, for all of the power consumed. The energy produced by the renewable energy system is then credited to the customer at the avoided fuel cost.

For a 6kW solar system, the price of a 6kW hybrid solar inverter is around 375,000 to 520,000 Rupees. Remember! The cost of a 6kW solar system in Pakistan can vary based on various factors, and it's essential to consider the quality of components, installation costs, and local market conditions when planning to install a solar system. ...
