Who oversees the energy sector in Uzbekistan?

In Uzbekistan, the governance of the energy sector is overseen by key governmental bodies, primarily the Ministry of Energy which was established in February 2019. This ministry is responsible for the implementation of state policies, regulations, and decrees across various energy subsectors including electricity, natural gas, and oil.

How much energy does Uzbekistan use?

Uzbekistan had a total primary energy supply ( TPES) of 48.28 Mtoe in 2012. Electricity consumption was 47.80 TWh. The majority of primary energy came from fossil fuels, with natural gas, coal and oil the main sources. Hydroelectricity, the only significant renewable source in the country, accounted for about 2% of the primary energy supply.

Will Uzbekistan develop a solar power plant?

Uzbekistan will be the first country in Central Asia to develop and produce solar energy by Uzbekenergo a state owned energy company. The Samarkand region was picked along with six other regions being inspected. The solar power plant is to have a capacity of 100 megawatts.

Why is natural gas important in Uzbekistan?

As of 2021, natural gas stands out as the predominant source of electricity generation in Uzbekistan, contributing to 88% of the overall electricity output. This significant dependency on natural gas underscores its vital role in the nation's energy strategy.

What is the Uzbek energy plan?

The plan includes achieving a renewable energy capacity of 27 GW and increasing the renewable share in electricity production to 40% by 2030. This initiative, endorsed by the Uzbek Senate, aims to reduce natural gas consumption by 25 billion cubic meters and decrease carbon emissions by 34 million tonnes.

How does Uzbekistan produce electricity?

Electricity production is a critical aspect of Uzbekistan's energy landscape. The country primarily relies on thermal power plants that convert heat from burning fuels or nuclear reactions into electricity, although this process can be inefficient, with up to fifty percent of the energy content lost.

Since 2021, Uzbekistan has commissioned ten green power plants, including nine solar and one wind, with a combined capacity exceeding 2,500 megawatts, as part of its ...

Uzbekistan, Kazakhstan, Azerbaijan and Georgia have all set off on a journey of energy transition, but each of these countries is taking a path of its own, as Anton Konnov, Alexey Mareev and ...

At AOC we aim at minimizing the environmental impact of our products and comply with latest environmental and regulatory standards. Our business monitors meet the EPEAT, TCO or Energy Star requirements and are made from 85% recycled plastics. They are also packed in fully recyclable brown cardboard with less oil-based ink and made of at least ...

For standard office purposes, we fulfil important energy efficiency standards with our broad range of business monitors, many of which come with comprehensive ergonomic adjustment options. For professional gamers, we redefine awesomeness with our selection of AOC Gaming and AGON gaming displays, which not only excel with their fast performance, but also with their ...

In 2022, natural gas remained the primary energy source in Uzbekistan, contributing 85% to the total energy supply and electricity generation, with a consumption of 1.552 BTU qn. The government plans to cease natural gas exports by 2025 to focus on domestic energy and petrochemical production needs, aiming for greater industrial development and energy self-sufficiency.

Uzbekistan's largest source of clean electricity is hydro (6%). Its share of wind and solar is less than 1% and is below the global average (13%) as well as its neighbour ...
