

Athos energy Angola

What is Angola's energy mix?

Angola's current installed capacity is estimated at 5.7 GW but only 70 percent is in use. The country's current energy mix consists of 61.8 percent hydropower, 37.6 percent other fossil fuels and 0.6 percent hybrid (solar/fossil fuel).

Which companies are active in Angola?

U.S.-based power product and solutions companies active in Angola include GE, Cummins, Caterpillar, and Westinghouse Turbines, among others. In addition, European companies (Germany, Portugal) supply equipment to the energy sector. Portuguese, Brazilian, and Chinese construction companies generally lead in project construction.

Who will build a 50 MW solar power plant in Angola?

The Italian company ENI signed a concession agreement with the government for the construction of a 50 MW solar plant in Namibe province, in southwestern Angola. The solar power plant will be constructed by Solenova, a joint venture between ENI and Angolan state-owned oil producer Sonangol.

Who is ETU Energias?

LUANDA, December 21, 2023 - Etu Energias (formerly Somoil) has acquired an additional 2.5% interest from Thailand's PTT Exploration and Production in offshore Block 17/06 in Angola, the local E&P player announced on Thursday.

How much does Angola spend on electricity?

The portion of the Angolan government budget dedicated to the electricity production, transmission and distribution sectors increased to US\$817.2 million in 2023 from US\$490 million in 2022. Angola's national budget for electricity assessment allocated is around US\$249.4 million.

Will Angola achieve a 60 percent electrification rate by 2025?

To achieve a targeted 8.9 GW of installed generation capacity and a 60 percent electrification rate by 2025, the government has instituted an ambitious infrastructure plan. Angola's current installed capacity is estimated at 5.7 GW but only 70 percent is in use.

Our customers are facing a challenging future. They want a flexible and viable partner to support them in a world of changing expectations. EthosEnergy turns on potential to deliver services and solutions globally for rotating equipment to make energy affordable, available and sustainable.

After every repair and/or overhaul, the gas generator and power turbine are performance load tested using gas and liquid fuel in accordance with ISO2314 and our test schedule with EELT-RD-ENG-019 which are all available on request.
