

Australia wellington solar llc

Where is the Wellington solar farm located?

Lightsource Development Services Australia Pty Ltd (Lightsource BP) acquired the development consent for the Wellington Solar Farm (the project) in March 2019. The project is located approximately 2 kilometres (km) northeast of Wellington in the Dubbo Regional local government area(LGA) (see Figure 1).

What is the Wellington solar project?

This project consists of a 200MWdc solar farm at Goolma Road, Wuuluman. Construction on this project commenced in December 2019. Interested parties will be able to find all the information they need about the Wellington solar project here.

How many solar farms and wind farms are there in Wellington?

Although there are nine approved or proposed State significant solar farms and wind farms in the Wellington area, the construction periods of these projects are unlikely to significantly overlap, and the project shares only a small section of its local transport route with the proposed Uungula Wind Farm.

Will Wellington solar farm change the landscape?

The Department accepts that with the approved Wellington Solar Farm, there is a further change to the broader visual landscape surrounding the project and a combined development footprint of approximately 1,103 ha.

Does Wellington North solar farm have an amendment report?

Wellington North Solar Farm - Amendment Report, NGH Environmental (2019). Wellington North Solar Farm - Amendment Report, NGH Environmental (February, 2021). Wellington North Solar Farm - Amendment Report, NGH Environmental (March, 2021).

Where is Saxa Road & Wellington North solar farm?

Saxa Road runs roughly parallel to the western site boundary, the Wellington North Solar Farm is set back by between 50 and 330 m from the public road and the Department acknowledges that in some areas there would be views across the two projects.

The proposed Wellington Solar Farm supports Australia in its efforts toward providing 23.5 per cent of its energy from renewable resources by 2020, while further establishing regional NSW as a leader in renewable energy. Planning for the project has commenced and is on track for completion in 2018. PROJECT LOCATION

In a few years our 600MWdc Wellington solar hub will be producing 1,173,000MWh of renewable electricity - the equivalent to powering 170,000 Australian homes - saving 938,000 carbon emissions annually." ... Lightsource bp shines in Australia. Wellington North is the latest to join Lightsource bp's
