

How can development finance support solar PV projects in Kosovo?

Many of the solar PV projects currently being developed in Kosovo have benefitted from support from development finance institutions such as the EBRD or the IFC. Indeed, the role of DFIs has arguably been instrumental in helping catalyse investment, and in building other lenders' confidence in providing loans to the sector.

How can Kosovo improve its solar and wind power system?

As Kosovo increases the share of solar and wind, it will need to put far greater emphasis on power system integration and on other aspects such as real-time weather forecasting in order to better govern the transition while maintaining reliability.

Can Kosovo transform its energy system to a lower carbon paradigm?

In this regard, the Republic of Kosovo stands at a crossroads: as a small, landlocked country in the heart of South East Europe, it has tremendous potential to transform its energy system toward a lower carbon paradigm.

Can pumped hydro storage be used in Kosovo?

In Kosovo's case, the use of pumped hydro storage could potentially be feasible, but given the range of flexibility options available, it should not be considered necessary to achieving Kosovo's overall energy transition objectives.

Is battery storage the lowest cost option in Kosovo?

As such, batteries can be an important complement to a power system dominated by variable renewables; however, as the graph above shows, battery storage may not necessarily be the lowest cost option in Kosovo's context, particularly if greater access to supply from neighboring jurisdictions can be secured through expanded grid interconnection.

How can Kosovo increase power flexibility?

Another way to increase flexibility is the continued expansion of transmission capacity with neighbouring countries. Kosovo has recently completed a transmission line to Albania, which enables it to operate as an integrated regulatory zone with Albania featuring greater two-way power flows.

New solar panels at N"Mal, a holiday resort in Rugova Mountains, Kosovo, installed as part of the Women Energy Entrepreneurship program. In Kosovo, rising electricity costs are one of the primary obstacles to greater economic growth. With that in mind, the MCC - Kosovo Threshold Program is investing in renewable energy products such as ...

Growing economies like Kosovo depend on a continuous, affordable source of energy for economic growth and to increase employment opportunities, in particular for underserved segments of society, such as women,
