

# Better power Greenland

Why is Greenland a good source of energy?

The energy is stable and environmentally sustainable. Greenland's enormous untapped hydropower resources exceed our domestic demands many times over, and Greenland has the potential to become a net energy exporter. Due to global warming the ice sheet increases meltwater, which results in larger reservoir capacities.

Is hydropower a sustainable solution for Greenland?

Johan Ljungberg, NIB's Head of Environment, recently visited the new hydropower plant in Greenland. He says hydropower is the best possible solution from an environmental and sustainability point of view for supplying power to the municipalities of Greenland.

How do I contact Greenland hydropower resources?

Contact Greenland hydropower resources Contact Department of Agriculture, Self-Sufficiency, Energy and Environment Minister for Agriculture, Self-Sufficiency, Energy and Environment P.O. Box 16013900 Nuuk Greenland Phone: +299 34 50 00 E-mail: pan@nanoq.gl

Is Greenland a net energy exporter?

Greenland has huge and abundant unexploited hydropower potentials. The energy is stable and environmentally sustainable. Greenland's enormous untapped hydropower resources exceed our domestic demands many times over, and Greenland has the potential to become a net energy exporter.

Is Greenland a good place for offshore wind power?

However, a study on wind and wave power potential on 22 islands has found Greenland to be one of the best sites for offshore wind power with 4555-5450 full load hours (FLH) in addition to good conditions for wave power with 1050-4000 FLH. Satymov et al. found 5000-6000 FLH in the south of Greenland for an improved wave energy converter.

Who runs Greenland's new hydropower plant?

The new hydropower plant, which will be the country's second largest and is expected to produce 58 GWh of electricity annually, is run by the national energy company Nukissiorfiit. According to Mr Christiansen, 70% of Greenland's energy comes from renewable sources.
