

What is the Brazilian energy review?

The Brazilian Energy Review is an annual publication of the Ministry of Mines and Energy. It presents an overview of the Brazilian energy sector in the previous year, with the aim of reviewing and documenting the evolution of energy supply and demand, infrastructure and several complementary data.

How much energy is produced in Brazil in 2021?

Brazil's energy production in 2021 accounted for 2.0% of global production and 48.8% of South America's total. Energy consumption in Brazil increased by an average annual growth rate of 0.5% between 2011 and 2021, compared with 3.3% between 2000 and 2010, driven by Brazil's real GDP per capita growth (Figure 4).

What is Brazil's energy mix?

Brazil's energy mix is diverse; hydropower, fossil fuels, biofuels, wind energy, and solar power all make significant contributions (Table 1). Brazil's total energy production increased by an average annual growth rate of 1.5% from 2011 to 2021.

What is the energy consumption rate in Brazil?

Energy consumption in Brazil increased at a slower pace, with an average annual growth rate of 0.5% between 2011 and 2021, compared to 3.3% between 2000 and 2010. Brazil continues to be one of the world's largest energy consumers, accounting for 2.0% of global consumption and 53.3% of South America's consumption.

Where do the national data from the Brazilian energy review come from?

The national data from the Brazilian Energy Review come, for the most part, from the compilations that the Energy Research Company - EPE carries out to construct the Brazilian Energy Balance. Various sector agents participate in these works, such as ANP, ANEEL, ANM, ONS, CCEE, Petrobras and Eletrobras.

What is the Brazilian energy balance 2020 - reference year 2019?

The Summary Report of the Brazilian Energy Balance 2020 - Reference Year 2019, presents consolidated information on how much and how energy was used in Brazil in 2019. In 2019, the total energy supply (total energy available in the country) reached 294.0 Mtoe, registering an increase of 1.4% when compared to the previous year.

The global energy demand in 2021 was 14,759.5 Mtoe, according to the IEA. In 2020, this amount was 14,203.6 Mtoe. Over the last 50 years, the energy matrices of Brazil and other countries ...

In 2020, Brazil derived roughly one third of its total energy supply from oil, and another third from biofuels. Access to electricity across the country is almost universal, making Brazil's energy ...
