

Cabo Verde acwa power

How much energy does Cape Verde produce?

Cape Verde is a net importer of energy, with no significant fossil energy resources. As of 2016, 176,743 tonnes of fuel (about 3,550 barrels per day) were sold on the internal market. Electricity production was 443 GWh in 2016, of which 81% from thermal power, 17% from wind power and 1.4% from solar power.

Who is the CEO of ACWA Power?

ACWA Power's board of directors is chaired by Mohammad Abdullah Abunayyan, with Raad Al Saady as its Vice Chairman and Managing Director, and Marco Arcellias as its CEO. In 2002, the Government of Saudi Arabia changed the regulations so that the private sector was permitted to own and operate utilities such as water and power plants.

Who owns ACWA Power?

The Public Investment Fund, the sovereign wealth fund of Saudi Arabia, acquired a 15% stake in ACWA Power in 2018, and has since increased that to the current 44% shareholder. ACWA Power developed Saudi Arabia's first major solar project, located in the north of the Kingdom.

Who produces electricity in Cape Verde?

Electra serves all islands of Cape Verde except Boa Vista, where electricity and water are produced and distributed by the public-private company *Energia de Boavista*. Other smaller electricity producers are *Cabeçuda*, which operates four wind parks, *guas de Ponta Preta* on the island of Sal, and *Electric Wind* on Santo Antão.

A consortium led by ACWA Power has started the operation of the 500 MW Ibra 2 solar independent power project in Oman in partnership with the Oman Power and Water Procurement Company (OPWP). Located in Ad-Dhahirah Governorate, the PV plant was built with an OMR160 million (US\$417 million) investment and developed on a build-own-operate basis.

We supplemented our initial materiality assessment by referencing it with the GRI reporting standards, as well as industry best practice. The materiality assessment helped us to identify our core ESG focus topics and indicators, which include climate change, water, health and safety and governance, and to develop our ESG framework accordingly.

This included the signing of power purchase agreements (PPAs) with grid operator JSC Uzbek National Electricity Grids for the two solar projects and three BESS projects the portfolio will comprise. The agreements cover 25-year terms for power generation and 10-year terms for the battery storage projects, with ACWA Power owning the portfolio.

Por Hamza Hamouchene El término «colonialismo verde» hace referencia a cómo a menudo los costes relativos a la producción de energía renovable y tecnologías verdes recaen sobre los pueblos coloniales como las comunidades indígenas, o los países del sur global. Se trata pues de un tipo de neocolonialismo. Resulta imposible negar el impacto del cambio
