

Cameroon solar complete

How to increase solar energy in Cameroon?

In order to enhance solar energy in Cameroon, the government recently signed an agreement with China to carry out feasibility studies aiming at installing several light points in Yaounde. . Recently, Cameroon obtained eKiss (energy-keep it simple and safe) mobile off-grid photovoltaic systems from Antaris Solar .

Does Cameroon have good solar potential?

There is good solar potential in Cameroon (see Fig. 5) but it is not well developed. The major cause of the poor state of solar energy development is the poor commitment and dedication of government in taking important steps to boost the sector. In most part of the country, the mean solar irradiance is approximately 5.8 kWh/m² /day .

Are solar power plants generating electricity in Cameroon?

The solar power plants have been completed in phases generating electricity throughout 2022 and are now fully completed. There have been reports of significant improvements of electricity supply in the northern parts of Cameroon. Regions that fall under the Northern Interconnected Network were prone to experiencing power outages.

Does Cameroon have a stable electricity supply?

There have been reports of significant improvements of electricity supply in the northern parts of Cameroon. Regions that fall under the Northern Interconnected Network were prone to experiencing power outages. Today we are proud to say that they have more stable power in the country courtesy to our rapidly deployable leasing solution.
