

Canada rts energy

What does Canada's vision for transforming the electricity sector mean?

Canada's vision for transforming the electricity sector adds support to our province's work to shift to low-emission power sources and our journey toward a future of clean, dependable, and sustainable power."

What are the main sources of electricity in Canada?

Wind and solar photovoltaic energy are the fastest growing sources of electricity in Canada, while biofuels and electric vehicles also play an important role in reducing the climate impact of transportation. In 2022, Canada produced 639 terawatt hours of electricity.

Is Canada's electricity sector a good business?

The electricity sector has been Canada's best performer when it comes to reducing emissions over the last 20 years--proving that expanding generation and reducing emissions at the same time is not only possible, but good business.

How much electricity does Canada produce in 2022?

In 2022, Canada produced 639 terawatt hours of electricity. 70% of Canada's electricity comes from renewable sources and 82% from non-greenhouse gas (non-GHG) emitting sources such as solar, hydro, wind and nuclear power. Canada is the world's third largest producer of hydroelectricity. 62% of Canada's electricity comes from hydroelectric sources.

Why should we retrofit power plants in Canada?

Retrofitting power plants and building new clean sources of electricity means cleaner air and the creation of good jobs in communities across Canada.

What are Canada's Clean Electricity Regulations?

Today, Minister Guilbeault presented Canada's finalized Clean Electricity Regulations, which are the result of almost three years of extensive consultations with provinces, territories, Indigenous communities, industry, and other stakeholders and provide the certainty necessary for planning Canada's future electricity grid.

The devices, such as Economy 7 and other multi-rate energy tariffs, pick up the different energy rates through the RTS signal - this is broadcast alongside the long-wave channel for BBC Radio 4.
