What is CFE energy?

CFE Energy products combine the latest technology trends with extensive safety features. Energy Storage System technology offers a modular, flexible design that can be easily customized to meet diverse customer needs in a range from compact entry-level models to large-scale enterprise solutions.

Where is CFE energy storage available?

With decades in the industry, years of R&D, and a market-leading position of satisfied customers in Asia and other geographies, CFE now brings its technology to Europe, Middle East, and Africa. Our local professionals are making CFE's energy storage solutions available to all customers in these markets.

Why should you choose CFE?

CFE is transforming the way electricity is produced and delivered through advanced technology. Our energy storage solutions can be deployed rapidly and with pinpoint precision, can be used to make the power network more resilient. Our R&D team has been engaged in the clean energy business for more than 20 years.

Why do you need a CFE storage solution?

If you live in a place that experiences frequent brownouts or has a decaying energy infrastructure, CFE storage solutions can help insulate you from the consequences of poor grid management. You move to greater self-sufficiency and are more in control of your energy destiny.

What makes CFE unique?

At the core of our products is science, CFE has a team of over 200 in R&D, multiple research centers, and PhD holders working towards the same vision of optimizing energy efficiency. Our modern, high precision facilities are manufacturing at scale with 13 fully automated production lines and 2 GW of output per year.

How does CFE expand its global footprint?

CFE expands its global footprint by establishing the European headquarters in Vienna, Austria. CFE's European entity completes its first warehouse to serve the entire EMEA region. CFE is set to exhibit its energy storage solutions and announce its European presence at The smarter E Europe 2022.
