Who owns scale microgrid solutions (SMS)?

Solar array. Author: Som Energia Cooperativa. License: Attribution 2.0 Generic. New York-based private equity firm Warburg Pincus LLC has made an equity commitment of up to USD 300 million (EUR 272m) to distributed clean energy company Scale Microgrid Solutions (SMS).

What is a microgrid & how does it work?

Microgrids are integrated systems of on-site energy resources such as solar, battery storage, and generators, which can work in tandem with the utility grid or operate independently in the event of a power outage.

Who is scale?

Scale is a vertically-integrated distributed energy company that has streamlined the entire process of delivering cutting-edge microgrid solutions for our customers. Our team of industry-leading experts offers unparalleled project design accuracy and optimization to meet your goals for a given site and market. Want to stay in the know?

Why should you invest in microgrids?

Our microgrids deliver results for your organization, with optimized on-site energy resources that provide cost savings, lower emissions, and enhanced resilience. We accelerate the growth of distributed energy by providing a wide range of financing offerings and deep, industry-specific expertise to customers and partners.

What if a utility outage is a microgrid?

In the event of a utility outage, our microgrids can operate independently (or "island") from the grid and ensure critical operations stay online. Scale manages everything from microgrid design and construction to ongoing operations and maintenance, making a complex process headache-free.
