

Circor energy Portugal

Who is Circor energy?

CIRCOR Energy is a market-leading, global provider of integrated flow control solutions in the expanding and evolving oil and gas industries, specializing in highly engineered valves and pipeline products and services.

Who is Circor International?

CIRCOR International is a global manufacturer specializing in highly engineered, complex and severe environment products that serve long-term, high growth infrastructure markets, including oil and gas, power generation, industrial and aerospace & defense. On this page you find our locations around the world

What does Circor do?

CIRCOR delivers pump & valve systems and custom engineering & design services designed to address the most mission-critical and severe-service applications. On land and sea, in air and space, and under the ocean's surface, when failure is not an option, the most trusted name in critical fluid handling is CIRCOR. If it is flow control, it's here.

What industries does Circor serve?

With a history dating back to 1860, CIRCOR serves a wide range of industries including oil and gas, commercial marine, defense and power generation. We also produce well-known global brands like Allweiler, Imo, Houttuin and Warren.

Why should oil & gas customers choose Circor?

The escalating number of environmental regulations and significant power needs in refineries. Customers turn to CIRCOR for fluid-handling solutions that transfer critical fluids without interruption and keep equipment running at peak efficiency. Because failure is not an option in oil & gas.

Why should you choose Circor for a pump & valve system?

The stakes are high, the environments are demanding, and the consequences are catastrophic for those tasked with fluid handling in the world's toughest environments. CIRCOR delivers pump & valve systems and custom engineering & design services designed to address the most mission-critical and severe-service applications.

CIRCOR International is a global manufacturer specializing in highly engineered, complex and severe environment products that serve long-term, high growth infrastructure markets, including oil and gas, power generation, industrial and aerospace & defense. CIRCOR Industrial Pumps deliver an extensive portfolio of pumping and fluid handling technologies, enabling us to meet the needs of customers in demanding applications around the world. ... providing solutions for a wide range of ...

Circor energy Portugal

This impeller is driven by a drive motor via a shaft and transfers mechanical energy to the pumped fluid continuously flowing through the impeller. The liquid enters the impeller axially and is accelerated from the inside to the outside by the effect of centrifugal force. This results in a transfer of energy into pressure and velocity energy.

CIRCOR Energy is a market-leading, global provider of integrated flow control solutions specializing in the manufacture of highly engineered valves, fittings, pipeline products and ...

The battery and cable industries rely heavily on precision and efficiency, and CIRCOR'S ZENITH METERING PUMPS are engineered to deliver just that. Whether it's handling high pressures or viscous materials, ZENITH pumps & Systems are designed to excel in these challenging environments, ensuring reliable performance and optimized production processes.

Circor Energy. US-based Circor Energy is one of the leading designers and manufacturers of highly engineered products and sub-systems. The company caters to numerous industries such as oil and gas, industrial, aerospace, defense, power generation, commercial & institutional facilities, and marine industry segments. ...

CIRCOR is a world leader in the development, engineering, manufacturing, distribution, service and support of fluid handling systems. With a history dating back to 1860, CIRCOR serves a ...

CIRCOR markets its solutions directly and through various sales partners to more than 14,000 customers in approximately 100 countries. The Company has a global presence with approximately 3,100 employees and is headquartered in Burlington, Massachusetts.

CIRCOR tackles tough challenges in four distinct oil & gas applications: production, transportation, storage, and refining. Our expert team of oil industry engineers and technicians ...

Pibiviesse S.r.l. (Circor Energy) About; PIBIVIESSE was established in 1981 by three partners, combining the forgemaster expertise with the experience in valve design, manufacturing and marketing. Their vision of the future was to design and manufacture state-of-the-art valves "designed to perform - built to last" for the most demanding ...

US-based Circor Energy is one of the leading designers and manufacturers of highly engineered products and sub-systems. The company caters to numerous industries such as oil and gas, industrial, aerospace, defense, power generation, commercial & institutional facilities, and marine industry segments.

Circor energy Portugal

Houttuin, a CIRCOR brand, developed the original pump design that became the blueprint for today's low-pressure, twin-screw positive displacement rotary pumps. These pumps, initially built in 1929 for the Dutch coal industry, solidified our ...

Centrifugal pumps typically have a lower initial cost; however, three screw pumps have a lower life cycle cost when you factor in operating efficiency and thus energy costs and maintenance costs. CIRCOR also produces complete lubrication engineered systems for rotating equipment throughout the power plant.

US-based Circor Energy is one of the leading designers and manufacturers of highly engineered products and sub-systems. The company caters to numerous industries such as oil and gas, ...

About CIRCOR Energy CIRCOR Energy, a business group of CIRCOR International (NYSE: CIR), is a global manufacturer and marketer of highly engineered flow control solutions to upstream and midstream ...
