Renewable heat. Renewables also have an important role in providing heat for buildings and industrial processes. To achieve decarbonisation and energy saving objectives, many countries are encouraging individual homes and buildings to shift from fossil fuel heating systems such as gas- or oil-fired boilers to systems like heat pumps which are much more efficient and can be ...

Energie Centrafricaine (ENERCA) is the sole power utility in the Central African Republic. This PPIAF's technical assistance aims to identify the actions needed for ENERCA to achieve its recovery and development objectives and to attract private sector participation to management in both the short and the long terms. The team delivered a comprehensive diagnostic of ...

To many energy experts and climate activists, TotalEnergies' efforts are a clear exercise in "greenwashing" timed for maximum influence during the major climate talks. They point out that, for all the company's PR on sustainability and energy transition, it remains the majority shareholder in the controversial East African Crude Oil Pipeline (EACOP).

Air and water pollution is a major environmental problem in CAR. Annual outdoor PM2.5 levels in CAR can reach 57 µg / m³, which exceeds the recommended maximum of 10µg / m³, especially in urban centers like Bangui [1]. In addition, the majority of the Central African population is regularly exposed to dangerous levels of indoor air pollution since more than 90% of the ...
