BOSAL's global presence of owned R&D centres is complemented with a worldwide network of industry partners, as well as research and educational institutions.

What makes bosal group a great company?

The BOSAL Group plays a major role in shaping a cleaner future. From automotive to energy solutions, our products are recognised and valued by our customers worldwide. It's a fact we're immensely proud of. Our constant (and successful) journey to make agility our strength is something we're proud of too.

What makes bosal unique?

BOSAL's global presence of owned R&D centres is complemented with a worldwide network of industry partners, as well as research and educational institutions. Manufacturing and distribution centres are strategically positioned to cover the footprint of BOSAL's global Original Equipment Manufacturer (OEM), aftermarket, and energy customers.

How many barrels of oil does Congo produce a day?

Currently, Congolese oil production is limited to the Coastal Basin, yielding 25,000 barrels per day of offshore production, all of which is exported. Along with recently identified potential oil fields, the DRC may hold as many as 30 billion cubic meters of methane and natural gas in three major petroleum deposits.

SCLOG provides comprehensive logistics services for the petroleum industry, including the storage of petroleum products, transportation by trucks, railcars, and barges, as well as the loading of tanker trucks. We also offer support services for vessels, ensuring seamless and secure logistics for our clients in an ever-evolving environment.

Transportation and storage of natural gas and crude oil is a major activity for the industry, sometimes known as the midstream segment. Truck, rail tank and ship loading are usually custody transfer measurements, when the products change ownership.

There are other projects to be exploited in this sector, including prospecting and exploration of sedimentary basins; the construction of an oil pipeline crossing the basins; the construction of storage infrastructures; the construction of refineries; the production of road bitumen in Central Kongo; storage and transport by pipeline; and the ...
