

In electric naval applications, battery storage management plays a key role. The second-life battery use is a fundamental part of the sustainable development of these waterborne transport systems.

Live eBay auction here I am selling 13 used EIG 20ah cells and a 14s BMS(30A charge/discharge) Average 16 mohm The cells have been unused for over an year and have been used for an ebike setup before 4 cells of the 13 were separately used for lighting setup. Always used the cells with BMS...
