What is Encell fused iron battery?

By applying 21st century technology to Thomas Edison's original, long lived and high cycling nickel iron battery, Encell has created the world's most durable and longest cycling battery. The Encell Fused Iron Battery has the capability of doing over 15,000 full 100% DoD cycles enabling the lowest levelized cost of storage (LCOS) in the market.

What is Encell technology?

Encell is committed to solving the challenges of managing, storing and delivering energy in a clean, reliable, and cost-effective way. At Encell Technology, we have a vision. We see an energy future that is far less reliant on the old ways of generating energy and increasingly committed to using alternative sources such as wind, solar, and wave.

How long does an Encell fused iron battery last?

With a float charge battery life of over 20 years and no capacity fade for the first 75% of total cycle life, the Encell Fused Iron Battery is estimated to cost up to one-tenth the price per kilowatt hour on a LCOS basis in comparison to a lead acid battery with similar name plate capacity.

Where are industrial series nickel iron batteries made?

The Industrial Series Nickel Iron batteries are imported from one of the largest battery factories in the world, located in Sichuan province of Western China. This production facility has been building batteries since 1971, and is known for producing the highest quality batteries available.

Who is autobatt Kenya Limited?

Outstanding service and premium quality products make Autobatt Kenya Limited a go-to for all automotive needs. Autobatt Kenya limited is a leading distributor of premium Automotive Aftermarket products in Kenya, providing top-tier Batteries and Accessories along with exceptional after-sales support.

How many kilowatts can a nickel iron battery hold?

A nickel iron battery with refillable alkaline electrolyte has a large storage capacity (up to 48 kilowatt hours) for either 12, 24 or 48 volt systems. This nearly indestructible battery can be discharged to 80% of its capacity without any harm. Some of Edison's batteries are still in operation.

Battery Type: Rechargeable, Flooded Chemical System: Nickel Iron (NiFe) Weight: 11.3 kg (24.8 lbs)  
Nominal Discharge Voltage 1.2-1.3 Volts (rate dependent) Nominal Cell Capacity C/10 to 0.9V330 Ah  
Nominal Cell Capacity C/5 TO 0.9V. ... Author: Corey ...

Typical battery sizes range from 5 to 50 kWh in 12v, 24v and 48v configurations. The batteries can be paired with PV solar, generators and grid power or some combination thereof. Encell's NiFe batteries work well with

most standard, off ...

Typical battery sizes range from 5 to 50 kWh in 12v, 24v and 48v configurations. The batteries can be paired with PV solar, generators and grid power or some combination thereof. Encell's NiFe batteries work well with most standard, off-the-shelf inverter/battery charger hardware.

Encell is a Florida based manufacturer of proprietary nickel iron batteries. Based on patent-protected Fused Iron Technology TM. Encell's NiFe batteries are uniquely well suited for the rapidly emerging stationary energy storage market. ...

Encell Technology, an energy storage battery and electronics company, recently announced the introduction of the Atlas 160 Nickel-Iron battery. The first production of these 160 Ampere-hour, front-terminal, 12 volt rechargeable batteries shipped this week. The battery is designed to replace traditional valve-regulated lead-acid (VRLA) batteries in demanding ...

Encell's battery technology uses totally green materials, produces the required power through its unique battery chemistry, and provides a life span that far exceeds that of competing solutions. The result is an environmentally responsible, safe and scalable solution affording users with the lowest total cost of ownership for long term energy storage applications.
