

Energy team ns Switzerland

What is Switzerland's energy strategy?

Switzerland's energy relies mainly on hydroelectric, nuclear, and natural gas, as well as imported petroleum for cars since Switzerland produces no fossil fuels. Launched in 2011, the 2050 Energy Strategy aims to shift towards sustainable energy practices, achieving climate neutrality and reducing reliance on fossil fuels.

What is Switzerland's wind power potential?

Switzerland's wind power potential is several TWh per year. The 2050 Energy Strategy aims to increase production from wind energy to 4.3 TWh a year, this would generate around 7% of the country's electricity.

What was the energy system like in Switzerland?

There are three different periods. An agrarian society until the mid-nineteenth century, Switzerland's small scale energy economy was based on wood and biomass (plants feeding the animal and human labour), which was in general renewable energy. Also used were wind power and hydraulic power, and, from the eighteenth century, indigenous coal.

What is Switzerland's energy policy?

Switzerland's energy policy includes measures targeting CO2 emissions, such as the implementation of a CO2 tax in 2008. Furthermore, in 2021, legislation was passed to reinforce the expansion of domestic renewable energies, aiming to enhance the country's supply security.

Which energy sources are most popular in Switzerland?

Hydroelectric power dominates, representing over 60% of Swiss energy, while solar power shows significant growth potential, outpacing other 'new' renewables. Notably, renewable energy predominantly powers electricity generation in Switzerland, comprising 80% of its usage.

Why is hydroelectric power important in Switzerland?

The high proportion of energy generated through hydroelectric power and the lack of natural resources (such as coal and oil) help to explain why such a situation is strategically beneficial in Switzerland. In 2017, Swiss voters accepted the revised Energy Act, endorsing the implementation of the 2050 Energy Strategy, which principally aims to:

Another national referendum last December aimed to impose a potentially massive energy tax - including hydro plants above 1MW - to cover most of the country's social security costs. The proposal (from Switzerland's Green Party) was defeated by 77-23%, after the government warned it would make Swiss hydro uncompetitive. New challenges
