

Ginlong solis Greece

What is Ginlong (Solis) Technologies?

Ginlong (Solis) Technologies (Stock code: 300763.SZ) is a company that has one of the widest installed bases of string inverters globally. Our inverters convert DC to AC power and interact with utility grids in markets around the world, reducing carbon footprints and helping enrich society.

What is Ginlong Solis?

Ginlong Solis is a company that provides residential, commercial and utility-scale sectors with sustainable solar products while promoting a scientific, green and humanistic culture. They offer the SOLIS-MINI-3600-4G, a 3.6kW Mini Series inverter with a precise MPPT algorithm and a maximum efficiency above 97%.

How do I contact Solis (ginlong)?

Solis (Ginlong) themselves appear to be virtually impossible to contact. They don't seem to have a UK website and I had great difficulty getting hold of a technical support number. I eventually managed to get hold of a mobile number of a guy who told me I should send him an email. Which I did yesterday but I'm still yet to get any response.

Who is ginlong technologies?

Ginlong Technologies manufacture and develop products for all solar market sectors. Our strength in research and development, coupled with our world class supply chain and manufacturing capabilities mean we are able to tailor and optimise our products for regional markets.

What is a Solis string inverter?

Trading under the brand name Solis, our cost effective and innovative string inverter technology is optimised for local markets, delivering significant long-term return on investment and accelerating the transition to a more sustainable future by reducing the global carbon footprint.

What does Solis do?

Solis conducts the construction of our corporate buildings and factories in accordance with the relevant national standards and develops detailed plans for environmental protection, safety, energy conservation and occupational health.

The S6 (Series 6) hybrid energy storage string inverter is the latest Solis US model certified to IEEE 1547-2018, UL 1741 SA & SB, and SunSpec Modbus, providing economical zero-carbon power from an all-weather (Type 4X / IP 66) high-efficiency PV string inverter. This hybrid inverter can be DC-coupled to a variety of batteries, enabling a versatile off or on-grid solution.
