South Korean utility Korea Electric Power Corp. (KEPCO) has officially finished construction works on a massive battery energy storage project in the city of Miryang, in Gyeongsangnam-do Province.

Invicta Durasteel was contacted directly by Metka on behalf of Gresham House Energy Storage Fund, a specialist alternative asset manager investing in UK-based battery energy storage systems. Gresham House had acquired a 40MW battery storage facility in Glassenbury, Kent, which currently stands as one of the largest battery storage facilities in the UK.

The 40MW battery park in Glassenbury in Kent, south-east England and the 10MW battery park located at Cleator in Cumbria, north-west England, will deliver a quarter of the 200MW capacity secured by National Grid to provide sub-second grid flexibility to increase reliance on low-carbon forms of electricity generation.

Including the new assets, Gresham House owns 15 battery storage projects in 12 counties. Last month, it

bought a 25-MW battery-only project in North East England from Enel Global Thermal Generation SRL and also completed a previously announced 10-MW expansion of its Glassenbury project in Kent. You can subscribe to our M& A newsletter [here](#)

Glassenbury, one of Gresham House's UK battery storage projects. Image: Gresham House. Gresham House, a stock exchange-listed investor in battery storage in the UK and Ireland, has said the majority of its development pipeline projects could have at least two hour durations of storage when built.

The 50MW portfolio, which is now grid connected, spans two sites including a 40MW battery park in Glassenbury in Kent and a 10 MW battery park located at Cleator in Cumbria. The two sites secured contracts as part of 2016's 200MW National Grid Enhanced Frequency Response (EFR) auction, and will deliver a quarter of the auction's capacity.

> Stats > United Kingdom > Power Plants > Glassenbury Battery Storage. Glassenbury Battery Storage is a battery power plant operated by Low Carbon with a total output of 40.00 MW. Glassenbury battery storage South Korea

Carbon. Gore Street Energy Storage Fund, one of the country's maiden listed energy storage investors, has entered into agreements to acquire a 160MW portfolio of battery storage projects in Northern Ireland and the Irish Republic.

The market for battery energy storage is estimated to grow to \$10.84bn in 2026. The fall in battery technology prices and the increasing need for grid stability are just two reasons GlobalData have predicted for this growth, with the integration of renewable power holding significant sway over the power market.
