Was ist Gobel power?

Gobel Power has mastered core technologies from battery modules, BMS to complete vehicle battery pack development, which enhance the safety, cost, energy density, recycle life and other performance indicators. Die KfW Photovoltaik Förderung wurde für das Jahr 2023 angepasst.

Do I need a battery management system (BMS)?

If you connect several cells in series, you definitely want a BMS. If not for optimisation purposes then for sure for safety and peace of mind. A BMS controls and monitors your whole battery on cell level, disconnects the whole battery in case of over or under voltage and prolongs the life of your precious battery.

Why should you choose Gobel power?

Gobel Power only uses authentic quality battery cells from reputable and top level manufacturers to produce batteries. Our packing factory has skilled workers, advanced machines and standard process to ensure every battery's quality. Our thorough and professional pre & post-sale service system will provide tailored solutions for your needs.

What is the difference between a battery balancer and a BMS?

A BMS controls and monitors your whole battery on cell level, disconnects the whole battery in case of over or under voltage and prolongs the life of your precious battery. An active balancer just balances your batteries, shovels energy from a cell with higher voltage to one with lower voltage.

Which BMS is best for a solar system?

If you want an industry leading BMS with great communication options to all major inverters, the SEPLOS Smart BMS is the one. It comes with a nice display which gives you all information you need. CAN and RS485 ports are there for communicating to other batteries but also to your Solar system, like the Victron Venus OS.

Is the heltec smart BMS good?

The HELTEC Smart BMS feels a bit outdated with no real outstanding features. It is a basic protection board with a beginner friendly app and connection. View the video review here. It comes with a display, RS-485 or CAN and Bluetooth communication.
