

Government subsidies for solar container in the valley

<div class="df_qntext">Why did the Dutch government grant EUR100 million to solar PV projects?

Image for representation purposes only. The Dutch government recently announced EUR100 million in subsidies for the development and integration of battery storage in solar PV projects covering about 160-330 MW for 2025, in response to emerging challenges related to grid constraints and renewable integration in the country.

<div class="df_qntext">Why does Germany need a solar-plus-storage subsidy?

That compares to the effective 100% requirement that solar-plus-storage projects used to need in order to qualify for an investment tax credit (ITC) in the US, and still do for Germany's Innovation Tender. The subsidy is needed because BESS co-located with PV are 'not profitable', the government said.

<div class="df_qntext">Does Spain have a solar subsidy system?

Spain's subsidy system has particularly complex requirements and is known for long delays. "Even though the money is allocated, less than half the requested solar subsidies have been paid out after two years", said CAN's Seda Orhan. However, Spain also offers some of Europe's most generous maximum payouts for more expensive roof installations.

<div class="df_qntext">How much does a kWh subsidy cost?

The initial estimate for the subsidy is EUR0.14-29 per kWh of energy discharged. Independent research and consultancy organisation CE Delft has been heavily involved in the analysis of the scheme until now.

<div class="df_qntext">What is a EUR416 million subsidy?

The funds are part of a EUR416 million subsidy program announced last year to alleviate grid congestion. The authorities in the Netherlands have allocated EUR100 million in subsidies to the deployment of battery storage with solar projects for next year, as the country continues to struggle with a lack of power flexibility and grid limitations.

<div class="df_qntext">Will the Netherlands support battery storage in solar PV projects?

Netherlands recently announced EUR100 million in subsidies for the development and integration of battery storage in solar PV projects covering about 160-330 MW for 2025, in response to emerging challenges related to grid constraints and renewable integration in the country.
