

Accordingly, the main contribution of this work is to generate the DC performance ratio maps of three different types of silicon PV modules (monocrystalline, polycrystalline and amorphous silicon solar cells) for all Morocco, based on ground calibration of 20 grid-connected photovoltaic systems located in 20 Moroccan higher education institutions.

GCPV System's Description The grid-connected pc-Si PV system, which is composed of 8 PV modules and an inverter, is installed on the flat roof of the Physics department building of the Faculty of Sciences El Jadida in Morocco.

The aim of this study targets the performance analysis and the economic evaluation of two photovoltaic systems connected to the grid of 4.08 KWp, located in the same place in the roof of the research building at the Faculty of Sciences and Technologies Mohammedia, Morocco.

The main goal of this paper is to compare a one year performance of 5.94 KWp grid-connected PV module technology systems, constituted by three types of photovoltaic solar panels (Monocrystalline (mc-Si) (2.04KWp), polycrystalline (pc-Si) (2.04KWp) and amorphous (a-Si) (1.86 KWp))-silicon installed on the roof of the faculty of science Ben M'sik Casablanca. ...

2.1 Description of Location. The 4.08 KWp grid-connected PV system are installed on the roof of the Faculty of sciences Ben M'Sik Casablanca, with a latitude of $33^{\circ}33'56.33''$ North and a longitude $7^{\circ}32'29.22''$ West (see Fig. 1). Casablanca located in the central western part of the country bordering the Atlantic Ocean, with a latitude of $33^{\circ}35.2986''$...

Indirect power control of grid-connected photovoltaic system using fuzzy control with a three-level inverter ... Morocco has launched a national energy strategy whose objective is to produce in ...

International Journal of Power Electronics and Drive System (IJPEDS) Vol. 11, No. 2, June 2020, pp. 942-952 ISSN: 2088-8694, DOI: 10.11591/ijpeds.v11.i2.pp942-952 r 942 A novel fast MPPT strategy used for grid-connected residential PV system applied in morocco Sana Sahbani¹, Hassane Mahmoudi², Abdennebi Hasnaoui³, Mustapha Kchikach⁴, Hanane ...

Nowadays, Morocco focuses on RES, especially solar energy due to its abundance, in order to reduce its dependence on fossil products (e.g., coal, oil, gas). The aim of the work presented in this article is the modeling, the simulation, the experimentation and the assessment of the performance of a 2.040 kWp grid-connected photovoltaic (PV) system.

The paper present an evaluation of a grid-connected photovoltaic (PV) system installed on the roof of a government building located in Tangier, Morocco.

DOI: 10.1016/J.EGYR.2016.10.004 Corpus ID: 114300123; Performance analysis and investigation of a grid-connected photovoltaic installation in Morocco @article{Attari2016PerformanceAA, title={Performance analysis and investigation of a grid-connected photovoltaic installation in Morocco}, author={Kamal Attari and Ali Elyaakoubi and ...

analysis of the grid-connected PV system. Finally, conclusions and perspectives are given in Section 5. 2. GCPV System's Description The grid-connected pc-Si PV system, which is composed of 8 PV modules and an inverter, is installed on the flat roof of the Physics department building of the Faculty of Sciences El Jadida in Morocco.

this paper demonstrates a complete modeling and simulation of 15MW solar photovoltaic grid connected at the site of Oued Kebrite a town and commune in Souk Ahras Province in north-eastern Algeria. PVsyst software package was used to analyse the performance ratio and the different losses that occur in the system.

The main goal of this paper is to compare a one year performance of 5.94 KWp grid-connected PV module technology systems, constituted by three types of photovoltaic solar panels...

Morocco, located 180km east of Rabat, between the Rif massif and the Middle Atlas. Being part of the imperial cities of Morocco with an area of about 424 km², with a latitude of 34°03' North, a longitude of 4°58'59" West, and an altitude of 419 m at sea level. 1.2 Grid-connected PV system The grid-connected photovoltaic system consists of 12

In this paper, we apply the PVGIS method for estimating the performance of the first grid-connected PV micro-power plant in Morocco. PVGIS approach provides analysis and assessment of in-site solar energy resources and predicts with good accuracy

Solar PV plant The grid-connected PV system includes 12 amorphous silicon thin-film panels (a-Si), each one with ... A Case Study in Casablanca, Morocco 2.1. PV panels:

The main goal of this paper is to compare a one year performance of 5.94 KWp grid-connected PV module technology systems, constituted by three types of photovoltaic solar panels (Monocrystalline (mc-Si) (2.04KWp), polycrystalline (pc-Si) (2.04KWp) and amorphous (a-Si) (1.86 KWp))-silicon installed on the roof of the faculty of science Ben M'sik Casablanca.

In Malaysia, many researchers discussed the grid-connected rooftop PV system. A 6.08 kWp system was installed at the Malaysian Energy Centre, Bangi Malaysia [15], and the final yield and performance ratio of the system were presented for 2008 and 2009 was one of the projects under the Malaysia Building Integrated

Photovoltaic (BIPV) programme before the ...

Morocco has legalized injection of green electricity in the grid and should be adopting very soon the net-metering approach for low-voltage grid-connected photovoltaic systems (PVGCS). In this view, system over-sizing becomes critical for the investor since the electricity distributor should not be supposed to buy more than 20% of the ...

This paper is within the framework of the GISER (Gestion Intelligent des Systèmes d'Énergies Renouvelables). It's a project about 3kVA hybrid energy management in PERE Laboratory (Procédés des Énergies Renouvelables) of EST fez Morocco. We present a sizing study and a cost analysis of a photovoltaic system using simulation results with Sunny ...

This article presents the monitoring and evaluation of a grid-connected PV system with a capacity of 1001 kWp installed at a factory in Morocco throughout the year 2022. The findings of the study are as follows:

The focus of this paper work is to introduce and analyze a novel fast MPPT strategy applied in an improved grid-connected Residential PV system respecting the current legislative framework in Morocco, which allow to the consumer being an actor in the energy transition towards a low-carbon society by reducing his dependence to the electrical ...

Morocco, which allow to the consumer being an actor in the energy transition ... The overall grid connected PV system configuration scheme Figure 2. P-V and I-V characteristics of the PV array

This paper work introduces and analyze a novel fast MPPT strategy applied in an improved grid-connected Residential PV system respecting the current legislative framework in Morocco, which allow to the consumer being an actor in the energy transition towards a low-carbon society. Regardless its significant potential for generating renewable energy, Moroccan ...

150. Modeling of Grid-Connected Photovoltaic System Installation in Moroccan Ibn Tofail University . Maroua Bouksaim*,1, Yassin Acci2, Mohamed Nabil Srfi1 . 1. The Electronics and telecommunications Research Group ENSA, Ibn Tofail University of Kenitra, 14000, Morocco
