Who is Linka energy?

Linka Energy is among the world's leading developers of biomass plants for agricultural, industrial and residential use. We develop reliable solutions with an efficient use of the selected biofuels within; hot water-, high pressure hot water- and steam plants.

Why should you choose Linka energy?

You can choose us for the ongoing maintenance and service of your plant. Linka Energy is a specialist in the development, design and construction of fully automated biomass plants from 250 kW - 15 MW. The primary fuel types are straw, wood chips and wood pellets, but also more exotic fuels can be used.

How many plants does Linka have?

With more than 3,500 plants throughout the world, and even more to come, Linka is a skilled international collaborator - as developer and contractor.

Why should you work with Linka?

When working with Linka you get an innovative partner, who develops and adjusts the solution based on your specifications. Our patented combustion technology ensures a high efficiency and optimizes the operational costs. Linka is a flexible company close to its customers. We believe in good service - after trade and assembly as well.

AARHUS PROTEIN A/S - Linka Energy % Aarhus Protein wurde 2013 gegründet und produziert pflanzliche Proteine, die von internationalen Lebensmittelproduzenten in der Herstellung von Artikeln wie Fleischalternativen, Nahrungsergänzungsmitteln, proteinreiche Backprodukte sowie Futtermischungen für Tiere wie Rinder, Schweine, Geflügel und Fische verwendet werden.

Linka Energy has delivered more than 3,500 fully automated plants worldwide to various customer groups such as agriculture, industry, institutions and heat plants. The plants are supplied in the form of hot water and hot water systems as well as steam systems. All plants are designed for maximum fuel utilization, high reliability and minimal ...

Linka Energy A/S har produceret biomasse-, proces- og affaldsbaserede anl&#230;gssystemer til landbrug, industri, proces, biogas og fjernvarme i mere end 45 &#229;r. Vi specialiserer os i udviklingen og optimeringen af milj&#248;venlige former for energi baseret p&#229; b&#230;redygtig biomasse- og affaldsbr&#230;ndselsanl&#230;g, der reducerer CO2-udledningen.

B&#230;redygtig energi er en af de mest presserende udfordringer, vi st&#229;r overfor i det 21. &#229;rhundrede. Med konstant stigende energibehov og en global bevidsthed om klimaforandringer og milj&#248;p&#229;virkninger, bliver det stadig vigtigere at finde alternative energikilder og teknologier, der kan levere milj&#248;venlig og &#248;konomisk b&#230;redygtig energi til vores samfund.
