

Inverter solar system Australia

What are the best solar inverters in Australia?

Arguably one of the top solar inverters in Australia is the Fronius Primo. As a single-phase device, available in a variety of sizes, this inverter is a heavy favourite among Aussies, often regarded for its innovative technologies, high efficiency and intelligent communication and monitoring software.

What is a solar inverter?

One of the key components in a solar power system is the solar inverter. It converts solar energy from the solar panels (DC electricity) into AC electricity that you can use in your home. Many manufacturers in the solar market claim to sell the best solar inverter. Most are located outside of Australia, so how do you choose one?

Who makes the best microinverter in Australia?

Currently, Enphase is the only credible microinverter manufacturer selling its products in Australia. It boasts 48 million microinverters installed in 2.5 million homes around the globe. Virtually any solar panel is compatible with the Enphase microinverter, but the most efficient solar systems use the brand's battery technology.

Who makes a solar panel inverter?

Our solar panel inverters are manufactured by the industry's leading brands, such as LONGi Solar, JinKo Solar, Each Energy Inverter, and more. Book your free solar assessment with one of our trained assessors. Using 3D aerial imagery technology, we will assess the layout of your home and determine your eligibility for solar power.

Who is Solar System Pty Ltd?

Solar System Pty Ltd is a leading name in providing solar inverter products in Australia. We are a step ahead of our competitors when it comes to the quality of the products on sale. Our services include integrated proposals, planning equipment procurement and maintenance of Renewable Energy Source (RES) projects.

What type of solar inverter do I need?

As we mentioned before, a solar inverter with a capacity of 5kW is the most common type installed in residential solar systems across Australia. The solar inverter you buy needs to handle the maximum output of your solar system, as a minimum requirement. So, a 5kW home solar system will need a 5kW solar inverter.
