

Iso energy The Gambia

What is the government of the Gambia for the energy sector?

The long-term aim of the Government of The Gambia for the Energy Sector, as enshrined in the Vision 2020 document, is to maximise the efficient development and utilisation of scarce energy resources to support economic development in an environment-friendly way.

Why is energy important in the Gambia?

The availability of adequate, reliable, affordable and sustainable energy is a critical milestone in the socio-economic development of any country. While less than half of all households in The Gambia have access to electricity, over 90% are still dependent on solid biomass for cooking and heating. This has intensified poverty.

Should Gambia invest in the energy sector?

Future investment only occurs if there is sufficient confidence that investors today are gaining good returns. The Gambia has an attractive investment environment in tourism and other development sectors. It needs to broaden this to the energy sector. That means building its own capacity to implement its policies to promote and support Re.

Why should the Gambia Petroleum Ministry be a performance-driven Ministry?

To be performance-driven Ministry that would ensure that the Gambia's Petroleum sector contributes to the sustainable development of the country. To attain universal access to modern energy and geological services, harness petroleum and other mineral resources for a revitalized economy for national well-being in a sustainable manner.

Does Gambia have a duty-free policy?

It is acknowledged that through this policy Gambia Government grants duty-free concessions to items imported into the country for use in the Energy Sector, such as for electricity generation and distribution, and renewable energy - solar, wind and hydro-energy.

Why is the Gambia so dependent on petroleum products?

The Gambia, at present, is totally dependent on petroleum products for transport and electricity generation. This dependency has continued in spite of the existence of a formulated renewable energy policy, maintaining pressure on the national economy and ensuring a weak balance of payments.
