What is GLS Italy?

GLS Italy is one of the big three players in the Italian parcel and express market with a particularly dense network. It is close to its customers everywhere and transports parcels, documents, and pallets throughout the island, including Northern Ireland.

What does GLS do in the sustainability report?

In the sustainability report, GLS provides information on planned and ongoing projects in this area, as well as essential data on the ecological footprint, and examples of its social commitment throughout Europe. GLS offers reliable solutions for the shipment of goods in Italy, Europe and all over the world.

Where does GLS ship to?

GLS offers reliable solutions for the shipment of goods in Italy, Europe and all over the world. Europe is the defined core market; the Group is also present in Canada and on the west coast of the United States.

What will a bio-LNG plant do for Italy?

The plant at the Cascina Antegnatica farm would produce biomethane with agricultural waste from local farms and supply Vulcangas, according to a statement by Iveco. Moreover, the bio-LNG would be used to fuel the LNG-powered vehicles in GLS Italy's fleet, which includes Iveco S-Way LNG trucks.

How reliable is GLS?

The entire GLS system - i.e. the network of branches, information technologies, process monitoring solutions - has been designed to make every delivery reliable. The result: throughout Europe, GLS delivers over 90% of shipments within the defined standard times.

How many countries does GLS cover?

With its own companies and partners, the GLS Group covers 40 countries and is connected globally through contractually agreed partnerships. Reliability is one of the most important values for GLS, a group in which each employee works to improve this characteristic every day.
