

Jema energy Canada

Who is Jema energy?

Jema Energy is a leader in R&D projects at European level with more than 60% of the team dedicated to research, development and innovation of new power electronics products and solutions. We are involved in European projects in nuclear fusion, electromobility, hydrogen, solar energy and energy storage.

Why should you choose Jema energy?

We have a wide range of products to make the electrification of a line a reality from a single source. Jema Energy develops high quality interoperable chargers with the aim of maximising installation performance and minimising operating and maintenance costs.

Why was Jema acquired?

The main goal of this acquisition is to go even further in the development of innovative power solutions, including monitoring and cabinet integration. JEMA is renowned for its expertise in DC power equipment requiring extreme precision. The goal is to share knowledge and experiences to improve the solutions we offer to our customers.

Why should you choose Jema as a customer?

As a customer of JEMA, you will benefit from more optimal solutions in the short or middle term. By working closely together and sharing our skills, the next versions of our solutions will certainly exceed your expectations. Be ready for that! For the rest, everything will remain the same.

Why did Jema acquire CE+T?

JEMA and CE+T have been working together for many years as JEMA uses CE+T Power inverters in its solutions. In addition, both companies work in similar or complementary markets. The main goal of this acquisition is to go even further in the development of innovative power solutions, including monitoring and cabinet integration.

What changes are planned for Jema?

As a supplier, no changes are planned except that there may be higher common demand going forward. Since January 2020, Jema is part of the CE+T Group. The collaboration with the entities of the Group will benefit to everyone: customers, suppliers and companies.
