What is a power bank and how does it work?

A power bank is a device used to store energy for emergencies and also to charge devices later. It can be used to charge mobile phones, tablets, and even laptops. With the heavy usage of mobile phones and tablets, battery power tends to deplete faster than usual. Power banks store energy and can be used to recharge devices when a power source is not available.

How do I choose a power bank?

When choosing a power bank, consider your specific needs as they come in various shapes, sizes, and capacities. Power banks on Jumia have useful features like LED indicators to monitor power consumption or the amount of power left.
