owner-occupier or investor - there are many ways to generate electricity economically with photovoltaics,  
generate returns and at the same time make a great contribution to protecting the climate and nature. ... Store  
the PV electricity ...

The EU limit for plug-in solar is 800W, usually done with 2 panels and usually around 500EUR. I'm not sure  
if Luxembourg is already following EU rules and if creos/enovos actually has implemented a process to deal  
with those systems. The power station/camping things are definitely not going to make money.

The publisher"s Luxembourg Solar Power Market Outlook report consolidate the developments and build a  
perspective on growth from the point of view of the solar sector, in its current and future role. The report  
provides a comprehensive analysis of the historical development, the current state of solar power installation  
scenario, and its outlook.
