Texas A& M University College of Dentistry (TTUHSC-El Paso) Texas Tech University Health Sciences Center - El Paso School of Dental Medicine (UTSD-Houston) University of Texas School of Dentistry at Houston (UTHSC-SA) University of Texas Health Science Center at San Antonio School of Dentistry Utah

Obsolete extensions: o -m state: replaced by -m contrack Data point #2. Even so I found this SF Q& A titled: Firewall questions about state and policy? where the OP claimed to have asked this question on IRC in #iptables@freenode. After discussing it there he came to the conclusion that:

If you're using vim you can enter insert mode and type CTRL-v CTRL-m. That ^M is the keyboard equivalent to r. Inserting 0x0D in a hex editor will do the task. How do I remove it? You can remove it using the command. perl -p -i -e "s/r//g" filename As the OP suggested in the comments of this answer here, you can even try a `dos2unix filename

2024-2025 Michigan Secondary Essay Prompts: Essay 1 How do you hope to impact medicine and improve patient care in the future and why do you need a medical degree to fulfill these goals? (1500 characters) -OR - if applying to the Medical Scientist Training Program: Describe why you are...

The ^M is a carriage-return character. If you see this, you're probably looking at a file that originated in the DOS/Windows world, where an end-of-line is marked by a carriage return/newline pair, whereas in the Unix world, end-of-line is marked by a single newline.

Allopathic medical school-specific discussions of secondary prompts, interview invites, and experiences, and general discussions of the admissions process at a particular institution
