I love the myenergi products so the eddi looks great but this leads me to some questions, especially around payback. Reading this thread (eddi-a-year-on-the-savings-t4159.html) it looks like the eddi could have a very long payback period but from my calculations above it looks like the eddi could have a very short payback. I am therefore ...

Introduisez un eddi dans votre maison et vous pourrez profiter pleinement de l'nergie 100% verte g;n;r;e par votre syst;me de production solaire PV ou ;olien. Au lieu de la renvoyer au r;seau, votre investissement dans la production d'nergie devient plus efficace car notre produit intelligent eddi renvoie l'nergie ; vos syst;mes de chauffage.

Hi @myenergi_Dr_Chris I tried the Eddi bypass mode on the switch, but the immersion is not heating the cylinder any higher than 52 degrees (for additional info, I have 2 places I can validate this, first on the ASHP control panel, and second I have an evohome probe, both are reporting 52 degrees). I had a look at the cylinder manual and the max ...

Other eddi myenergi products are shown with details of how they integrate with the grid connection and the microgeneration system. Page . 6 of 33. Page 7 of 33. 5. Box Contents o 1 x eddi unit with mounting bracket attached o 1 x Current transformer with 5m cable (Grid CT sensor)

Today marks a year since we had an Eddi installed, it has diverted 235kWh to water heating, all sourced from Solar PV excess. We normally use a gas bo We've updated our ... myenergi & Products & eddi & ...

eddi product information. This product has been limited to one per order. eddi is a solar power diverter that helps you to make the most of your self generated power instead of exporting it back to the grid. Bring eddi into your home and make the most of the 100% green energy generated from your solar panel or wind generation system.

The eddi solar diverter logs all energy saving data to enable ongoing savings by optimising usage. There is also an intelligent daylight-saving time adjustment with overload and short-circuit protection for your peace of mind. Additionally, eddi is fully compliant with worldwide power grid standards and comes with a 3-year warranty. Explore eddi

My Eddi (200 litre tank) consumes just 1KWh per day, what water temperature is your thermostat set to.

Myenergi eddi RÃ©union

Beware of turning it too much as you'll get near boiling water. Nearly 3kWh seems reasonable energy input to me, it's the same as running the immersion for 1-hour before the Eddi was used.

For now your Eddi connected to the Immersion will heat the water exactly as it does now, you will need to talk to the installers so they incorporate your Eddi, if you do add the relay board you can also add PT1000 probes (again ensure they install a tank with spare tubes to easily add these) so you can see the tank temperature on the Eddi app ...

Most heat batteries enable storage from heated water just like an indirect tank you have now or electric sources, so the Eddi can satisfy the electric heating aspect providing the Sunamp heater load current does not exceed 16Amps and is a resistive load type.

eddi. Divert self generated power back into your home. eddi+. The 3-phase solar power diverter. libbi. Libbi is a modular battery storage system that adapts to your needs. harvi. ... The myenergi app allows you to monitor and control your eddi+ from anywhere in the world, with live updates on your energy usage ...

Bring an eddi into your home and you can maximise the consumption of the 100% green energy generated from your solar PV or wind generation system. Rather than giving excess electricity ...

eddi is intelligent Watch your energy go further with eddi. eddi easily connects into any existing micro-generation system. When added, eddi continually makes intelligent decisions every . 1 second about how and where your energy generation is used around the home. eddi offers 6 ...

I installed a relay board into our Eddi earlier on as per the instruction manual. Up until this point our Eddi has worked flawlessly. I installed as per their example 10 - for an S plan heating system.

HI Folks. We have two elements in our hot-water tank - a "basin" one (short) and a "bath" one (longer) - fitted in the top of the tank. Both are wired up to the eddi - as tank1 and tank2 respectively... - don't know why the installers did that, because, per-solar, we only ever used the long "bath" element

The built-in WiFi, ethernet, and myenergi app compatibility ensure seamless monitoring and control. eddi+ enables businesses to reduce energy costs, increase sustainability, and lower reliance on the grid--turning green energy ...

1 ??· Looking at Myenergi dashboard there"s the dreaded yellow triangles, looking at Eddi specifically there"s several blocks of yellow lines. How can the Eddi"s failure to communicate affect the Zappi charging? Or does it better indicate where any problem might lie? ... If your Eddi is determining EV charge issues, then it sounds like your ...

It works well with Eddi relay PCB. The wire is 1.5 meters. It came quickly first class (despite Royal Mails recent strike nonsense). £9.99 all in. The comprehensive menus for setting up the relay switching rules and sensor thresholds etc. magically appear in the Eddi menus when you install (plug in the ribbon connector) the relay expansion board.

If you only want that the eddi do not kick in so fast during the battery balancing the house demand, then you could use the response delay. If you set it to 30 seconds, then the eddi is waiting this time before he kicks in. Export margin you know.
