What does Winpower do?

As a global energy transition partner, WinPower provides engineering services and solutions for the different stages of energy project development, from the design, consulting, development, implementation, and O&M services.

What is Winpower LAN & WAN?

Chapter 1 Winpower Introduction 1. Winpower profile Winpower is a device monitoring software, which supports individual computer and computers connected with network (including LAN & WAN). It is used to monitor the intelligent device to protect computer systems from being shut down abnormally when power fails.

What are the components of Winpower?

Winpower contains three components: Agent, Monitor and TrayIcon. Note The concrete meaning of Agent refer to Appendix A glossary explanation. Agent is the key component of Winpower and runs as a system service on background.

How do I exit Winpower software tray icon?

Diagram 2-3-4 Exit: On Windows vista OS, Windows 2008 or Windows 7 OS, if you want to exit, right click the winpower Software TrayIcon, and select "Exit". Once you exit it, you should restart the computer to start it automatically. But if you have administrator privilege, you can start it again without restart.

What is a Winpower agent?

Agent is the key component of Winpower and runs as a system service on background. Agent communicates with the device, logs events, notifies users when UPS's event happens, arranges actions according to user's requirement and impending shutdown when necessary. Furthermore, Agent can be managed by Monitor.

How to start Winpower service automatically?

Copy the document of s99winpower from Linux (attached CD) to /etc/rcS.d, The file s99winpower is used to start Winpower service automatically. When the computer reboots, Winpower service will be started automatically. Just need to start the monitor interface by the command `"/monitor"` Remark: a.

Eaton's mission is to improve the quality of life and the environment through the use of power management technologies and services. We provide sustainable solutions that help our customers effectively manage electrical, hydraulic and mechanical power - more safely, more efficiently and more reliably.

Eaton's comprehensive line of Cooper Power series open air bank solutions are available in externally fused, fuseless or internally fused designs. Each design is custom built in a variety of parallel/series combinations to meet a full range of application needs based on kvar requirements, system voltage, protection strategy and
