

# Off grid solar with generator backup New Caledonia

Do you need a backup generator if the sun isn't shining?

While solar panels and inverters can provide clean energy during the day, it's important to have a backup plan for when the sun isn't shining. Installing a backup generator with your existing off-grid solar and inverter setup can ensure uninterrupted electricity and peace of mind, especially during power outages or inclement weather conditions.

Do you need a power supply if you live off the grid?

If you're living off the grid, a reliable power supply is important. While solar panels and inverters can provide clean energy during the day, it's important to have a backup plan for when the sun isn't shining.

Can I use multiple generators for a home backup power solution?

When planning to use multiple generators for your home backup power solution, it is essential to consider the parallel capability of the generators. This feature allows you to connect two or more generators together to increase the overall power output and provide longer runtime.

How do you maintain a backup generator during a power outage?

Regular maintenance and testing of your backup generator is important to ensure it works properly during an outage. Check the generator's oil and fuel levels regularly, and perform routine maintenance tasks like changing the oil and air filter. Test the generator monthly to ensure it's working properly.

Choose from our range of leading brand generators including Kubota, Cummins and Hyundai for a reliable cost-effective backup generator for your off grid power system, large or small. Designed and configured with Automatic start ...

Explore BLUETTI Australia's off-grid solar power solutions for you. Shop solar generator kits, portable power stations, solar panels, and more.
