RES, the world's largest independent renewables company, has been awarded the asset management contract for the landmark Larks Green project, the UK's first co-located solar and battery energy storage system connected to the transmission network. Developed by Enso Energy and owned by Cero Generation, the site near Bristol combines 70MW...

RES, the world's largest independent renewable energy service provider, has reached a significant milestone in its positioning in the photovoltaic sector. The prestigious consultancy Wood Mackenzie has recognized RES as the second largest Global Solar O& M operator in the world, an achievement that consolidates its leadership in the industry and...

To reduce CO₂ emissions and exposure to local air pollution, we want to transition our energy systems away from fossil fuels towards low-carbon sources. Low-carbon energy sources include nuclear and renewable technologies. This ...

The RES Group (Renewable Energy Systems) is the world's largest independent renewable energy company, having been in the sector for more than 40 years. As of 2023, the company had established more than 23 gigawatts of renewable energy projects worldwide and supported more than 12 gigawatts operations. Employing more than 2500 people in 14 countries, it operates ...

Renewable energy resources (RERs) have recently attracted much attention as environmentally friendly and sustainable energy resources. This attraction is derived from the non-sustainability nature of currently utilized fossil energy resources, along with the severe environmental impacts and price volatility [31] .

Driving a clean energy future through state-of-the-art renewable technologies. See all technologies. Wind. Moving the world towards a clean energy future through harnessing the power of wind. ... Stay up to date with the latest RES blogs and insights from the clean energy world. Videos. Watch our videos to learn more about RES, discover our ...

therefore the share of renewable energy in the system, is higher. The ramping requirement is higher in the renewables scenario as well. However, Panama's hydropower and natural gas-fired generation can cope with it. Analyses of the simulation results indicated that the renewables scenario has 5% lower annual costs

3 September, Denver, USA - RES, the world's largest independent renewables company, and the U.S partment of Energy's National Renewable Energy Laboratory (NREL), have partnered to license and deploy an innovative technology to optimize the performance of wind turbines. The "Dynamic Yaw" technology effectively innovates the yaw system of wind turbines -...
