

Price for solar panels New Zealand

A 3kW solar power system would need ten 300W solar panels at a rough cost of \$8000 - \$10,000 in New Zealand. Conversely, a 4kW solar power system would require fourteen 290W solar panels at a ballpark figure of ...

Typically, the average New Zealand home is equipped with a 5kW solar system, consisting of 11 to 12 solar panels. Smaller systems usually start at 3kW (around 7 panels), while larger setups, like an 18kW system (approximately 40 panels), are becoming increasingly common.

In 2023, a typical 5 kW solar power system in New Zealand costs around \$13,500. Like most other things, the larger a system, the lower its cost per watt. For instance, a small, 2 kW system may cost around \$7,500, which comes down to about \$3.75/W. ... This was just the price of the solar panels - add in all the other costs and a complete system ...

Absolutely! New Zealand has abundant sunshine and generates between 1,700 and 2,100 sunshine hours annually. Some areas, like Nelson and Gisborne, receive as much as 2,400. Solar Panels don't require sunshine; they require daylight, so Solar Panels work year-round, even in the lower South Island.

The average New Zealand household uses about 22 kilowatt-hours of electricity per day. To generate this amount of energy from sunlight would take 45 square metres of PV panels on your roof, which will usually easily be accommodated given the average residential roof size in New Zealand. The cost effectiveness of residential solar power is ...
