Prima power central europe Serbia

Prima Power PunchBend is a solution for the automatic fabrication of high-quality, ready-bent components from cut-to-size material. Very often the fabrication process, when manufacturing steel furniture, lighting equipment, domestic appliances, heating equipment, boilers, steel doors, etc., enables the use of cut-to-size material for improved production economy.

Dynamic solutions to level up your production process; Prima Power provides businesses of all sizes with targeted dynamic technologies that enhance profitability in sheet metal working.

As one of the largest producers of heat pumps and chillers, Clivet has chosen Prima Power's servo-electric technology to modernise its sheet metal processing plant with highly automated solutions that are fully Industry 4.0 integrated. The PSBB line represents the heart of the department, managing the entire production process with stations for punching, shearing, ...

Discover how Prima Power's Bending technology can help you optimize your production Panel Benders. In panel benders, the bending work is done by the blades, while the sheet press holds the sheet in place during the operation. The blades can then perform different types of folds, upwards or downwards, starting with the outermost folds of a side, before automatically ...
