Costa Rica has a strong focus on renewable energy, with 99.78% of the energy output coming from renewable sources in 2020. However, solar power currently accounts for less than 1% of the country's energy production. In November 2021, Costa Rica approved a bill that allows individuals to produce their own renewable electricity and sell their surplus energy.

The largest solar panel can provide 400 watt of power instantaneously, but only if you are in Liberia, Guanacaste in midsummer. Sergio Morales, assistant coordinator of the Electronic Systems Laboratory for Sustainability Technological Institute of Costa Rica (TEC), said that a typical kitchen can consume disk at time 2,000 W.

Quality solar panels Costa Rica

Currently, Costa Rica generates less than 1% of its energy production using solar power. In November 2021, Costa Rica approved bill 22.009 "Promotion of the generation of energy resources distributed from renewable sources," and Costa Ricans are now able to produce their own renewable electricity and sell their surplus energy.
