

What is energy in Romania?

Energy in Romania describes energy and electricity production, consumption and import in Romania. Romania has significant oil and gas reserves, substantial coal deposits and it has considerable installed hydroelectric power. However, Romania imports oil and gas from Russia and other countries.

Who produces electricity in Romania?

Electric power was provided by the Romanian Electric Power Corporation (CONEL). Energy sources used in electric power generation consisted primarily of nuclear, coal, oil, and liquefied natural gas (LNG). The country has two nuclear reactors, located at Cernavoda, generating about 18-20% of the country's electricity production.

What is Romania's green energy production potential?

According to studies conducted in Romania, the green energy production potential consists of 65 percent biomass, 17 percent wind energy, and 12 percent solar energy, together with 4 percent micro hydropower and 2 percent geothermal.

Is Romania delivering natural gas to Moldova?

Lately, Romania has begun delivering natural gas to Moldova, which is straining to satisfy energy demand in the midst of the Russian invasion of Ukraine. On December 3, gas began to arrive via a pipeline connecting the eastern Romanian city of Iasi to the Moldovan border town of Ungheni.

Is Romania a natural gas exporter?

Romania has the potential to become the greatest net exporter of natural gas in the European Union, partly as a result of its untapped Black Sea gas deposits. Its onshore gas reserves are believed to be 100 billion cubic meters, while those in the Black Sea's deep waters are estimated to be between 42 and 84 billion cubic meters.

Why did Romania move to net gas exports?

According to data from system operator Transgaz, Romania moved to net gas exports for the first time in almost a year and a half at the end of November, as sluggish demand allowed the country to balance on domestic production and storage alone.

EC allows Romania to pay subsidies to energy-intensive industrial consumers The government of Romania obtained the European Commission's green light to implement a RON 2.9 billion grant scheme ...

Romania Total Energy Consumption. Energy consumption per capita is about 1.6 toe (2023), which is 42% below the EU average, and electricity consumption amounts to 2 300 kWh/cap (57% below the EU average). Total energy consumption declined by 2.6% in 2023 to 31 Mtoe. It fell by 44% between 1990 and 2012, remained broadly stable at around 33 Mtoe ...
