Does Sierra Leone need a reliable energy supply?

The nationwide electrification rate was recorded at 5% (estimated at 12% in urban areas and 2% in rural areas) in 2018 with roughly 150,000 connected customers. The country's energy needs are hugely under served, and the lack of a reliable energy supply is the primary obstacle to Sierra Leone's development.

How much energy does biomass produce in Sierra Leone?

The programme is currently replacing old fridges. As of 2017, the total installed capacity generated from biomass was 33 MW with a potential to generate 2.706 GWh. According to the 2015 Population and Housing Census, 97% of the population in Sierra Leone use firewood or charcoal for cooking.

Does Sierra Leone need rural electrification?

There is currently no entity in Sierra Leone with a specific mandate to drive rural electrification in the country. This is being run by various departments in the Ministry of Energy and SLEWRC. The 2018-2030 plan, however, has set plans for the formation of a Rural and Peri-Urban Electrification Authority.

Could wind energy be a viable option in Sierra Leone?

There is some indication that wind speeds of 12 m/s are possible in parts of the country, implying that wind energy could be a viable option in selected locations. Currently, Sierra Leone has one wind energy system of 5 kW located in the Bonthe District, along the southern coastline.

How much electricity does Sierra Leone have?

As of March 2019, the installed electricity generation capacity in Sierra Leone was 113 MW. This is made up of 75 MW of hydropower, 4 MW of solar and 34 MW of bioenergy. The nationwide electrification rate was recorded at 5% (estimated at 12% in urban areas and 2% in rural areas) in 2018 with roughly 150,000 connected customers.

Does Sierra Leone need a middle-income plan?

The growth in services is expected to slow, however, due to weaker performance in tourism, transportation and communication. The Sierra Leone Medium Term National Development Plan (MTNDP) 2019 -2023 aims to achieve middle-income status by 2039. Measured by the national poverty line, poverty was 52.9 % in 2011 with no change since 2003.

"electricity" means energy fuelled by the transfer of electrons from positive and negative points within a conductor and generated from water, mineral, oil, coal, gas, solar energy, wind energy, atomic energy or any other means; "electric supply industry" means electricity generation transmission, distribution and supply;
