The port is also studying the potential to build a floating solar plant along with the Sohar University and the Netherlands' Delft University of Technology. It is the latest project being proposed at the port and free zone, in addition to the 300MW solar plant being planned by Qabas, the renewable energy arm of the Shell Development Oman.

Envisaged for implementation in a series of stages, the first 25 MW of solar-PV based capacity is expected to be operational before the end of this year, according to Sohar Port and Freezone. "SOHAR Freezone has joined forces with Shell, who will develop up to 300 MW of renewable energy, adding economic value to Oman and our industries.
