Solar energy is freely and abundantly available, virtually anywhere on earth, but especially in Africa. Solar power shields homeowners and businesses from power blackouts and future electricity price hikes. The carbon footprint of solar power generators is much lower than that of coal or gas-fired power plants (about 10 to 20 times).

The Ilute solar park will add to the country's portfolio, including the 54 MW Bangweulu and 34 MW Ngonye parks, which have been operational since 2019. A 200 MW solar plant is also under construction in Serenje. These efforts highlight Zambia's drive to diversify its energy sources. However, Zambia still faces energy challenges.
