

Solar container catches fire in new york

<div class="df_qntext">Did New York fire a battery container?

The immediate damage was quite limited, beyond the battery containers themselves. No injuries were reported from any of the fires, according to the New York State Energy Research and Development Authority (NYSERDA), which plays a leading role in the state's grid storage efforts. Nor is the agency aware of any resulting toxic emissions.

<div class="df_qntext">What happened at the site of the solar farm fire?

According to FireRescue1.com, fire crews officially halted water operations at the site of the solar farm fire at 11 a.m. Sunday July 30th. Officials said water operations were stopped as the battery storage fire was contained. They continue to check the area to ensure the air quality remains normal.

<div class="df_qntext">How many energy storage projects are there in New York State?

As of May 31, there were 4,368 completed energy storage projects in New York State, according to data published by New York Energy Research and Development Authority (NYSERDA.) The vast majority of those are "retail" storage systems, installed at homes and businesses to store electricity produced by solar panels.

<div class="df_qntext">Are energy storage sites safe in New York?

The state working group will begin immediate inspections of energy storage sites across the state, Hochul said, and "collaborate with first responders and local leaders to identify best practices, address potential risks to public safety, and ensure energy storage sites across New York are safe and effective."

<div class="df_qntext">Could a ban be imposed in New York City's top green energy official?

Opposition to large scale battery plants that store wind and solar is imperiling Gov. Kathy Hochul's clean energy agenda -- with a ban even imposed in the hometown of a top New York green energy official, The Post has learned.

<div class="df_qntext">Are electric vehicles causing a 'battery energy storage fire'?

With the growing number of electric vehicles and batteries for energy storage on the grid, more high-profile fires have hit the news, like last year's truck fire in LA, the spate of e-bike battery fires in New York City, or one at a French recycling plant last year. "Battery energy storage systems are complex machines," Mulvaney says.

The blaze at Moss Landing in Monterey County, California, may have been worse because of the plant's design and the types of batteries used.
