

Solar container chassis riveting skills

<div class="df_qntext">What rivets are used for solar panels?

The Versagrip rivets, Solar Bead and Standard rivet for elongated hole are fasteners for solar panels intended for the structure module. Also the hardgrip and hardlock rivet could be used for solar applications. These fixings are made by our BRALO R +D +i team to achieve better efficiency and durability in the solar energy market.

<div class="df_qntext">What are the rivets for containers?

The rivets for containers are distinguished from the shape: Can be divided into: open blind rivets, closed blind rivets, single drum rivets, double drum rivets, inner locking wire drawing rivets, outer locking wire drawing rivets, waterproof lantern rivets, seahorse nails.

<div class="df_qntext">What is a structural rivet?

Know the technical data of the Structural rivet in this link. The Versagrip rivets, Solar Bead and Standard rivet for elongated hole are fasteners for solar panels intended for the structure module. Also the hardgrip and hardlock rivet could be used for solar applications.

<div class="df_qntext">Why are blind rivets a good choice?

Blind rivets have high tensile and shear strength, as they are designed for demanding applications. The fasteners for solar structures have multi-thickness behavior to be used in applications where the thickness of the materials varies, thus reducing inventory.

<div class="df_qntext">What are the standard specifications for rivets?

There are 11 commonly used standard specifications for rivets, they are 1.4mm, 16mm, 2mm, 2.5mm, 3mm, 3.5mm, 4mm, 5mm, 6mm, 8mm, 10mm.

<div class="df_qntext">What is the operation of connecting two or more workpieces with rivets?

The operation of connecting two or more workpieces with rivets is called riveting. Because riveting is simple to operate and flexible in application, it is generally used in situations where the force is not significant.

Mounted on this frame is the innovative PV rail system and the clever folding mechanism of the solar panels, which enable the transport dimensions and lifting ...
