What does ABB do?

ABB offers a range of technologies and services that support the entire battery industry ecosystem. For battery manufacturers, ABB provides automation, electrification, digital and robotics solutions that optimize battery production lines, ensuring efficiency, quality and safety.

Why is CMBlu partnering with ABB?

CMBlu Energy, a German company specializing in sustainable battery solutions, has partnered with ABB to optimize its battery production line. CMBlu's exciting battery innovations rely on organic materials and non-flammable electrolytes. ABB's industrial robots are playing a key role in assembling these high-performance battery modules.

Is ABB launching a hybrid diesel-electric maintenance vehicle?

Austrian Federal Railways is launching a new fleet of hybrid diesel-electric maintenance vehicles with battery technology supplied by ABB.

Are batteries a viable alternative to green hydrogen based energy storage?

Batteries can also play a complementary role to green hydrogen -based energy storage. ABB provides a comprehensive BESS portfolio, spanning batteries, battery management systems, inverters, switchgear, transformers, and protection and control systems, to ensure seamless integration of renewables into the grid.

What is ABB's plant optimization methodology for battery makers?

ABB's Plant Optimization Methodology for Battery Manufacturers, for example, is a set of solutions that help battery makers improve project execution at every stage of the lifecycle.
