

Sovereign solar Guatemala

Is Guatemala a good place to invest in solar energy?

Guatemala is the second largest Central American power market, with a goal to increase renewable energy use. Relatively high levels of solar irradiance and large areas of cleared land give the country a strong potential for increased solar energy development.

Does Guatemala have solar energy?

Notably, Guatemala has seen previous ventures into solar energy, including the announcement of a 5 MW photovoltaic project in 2014 and a subsequent tender for a 110 MW project in 2019, which was later cancelled. As of 2023, the country had an installed photovoltaic capacity of 105 MW, according to IRENA statistics.

Why did BMR decide to buy a solar farm in Guatemala?

As part of its evaluation process, BMR determined that the solar farm offered a strong return that was supported by Guatemala's well-established and stable regulatory system. BMR navigated a complex and cooperative sales process that involved four owners across three legal jurisdictions.

The mini-split I ordered from Solar Sovereign on 7/30/24 was never delivered and now they are NOT returning my money. On 8/26/24 Jared Quinn told me it would take their "accounting department" two weeks to get me a refund (completely ridiculous since they had my PayPal payment the next day). Well, that deadline has come and gone.
