stored throughout the day which powers households during power outages and/or night-time consumption.

The formation of St. Vincent Electricity Services Limited (VINLEC) in 1961 set the pace for the development of the electricity sector in the country. During the early 1970's the government of St. Vincent and the Grenadines acquired 49% shares, while 51% remained with the CDC.

The Grenadines was also affected, as the lack of rainfall and very warm temperatures had all but dried up the limited supplies stored on the islands. On many occasions, water had to be taken by ferry, trucked, and then distributed on the islands. This further added strain to the already limited supply on the island of St. Vincent.
