

There is a battery storage bag at the back what can it hold

<div class="df_qntext">Are batteries allowed in hand baggage?

However, please note that there are also restrictions on carrying batteries and power banks in hand baggage. Commercially available batteries (without lithium) such as AA, AAA, C, D or 9-volt batteries are permitted in both hand baggage and checked baggage.

<div class="df_qntext">What is a battery bag?

A battery bag is a specialized pouch or case designed to store and transport batteries safely. Most are made from fireproof and shock-resistant materials. Their goal? To stop accidents before they happen. These bags go by many names: No matter the name, the function is the same--protect your batteries and everything around them.

<div class="df_qntext">Why do you need a battery bag?

A battery bag is more than just a pouch. It's a protective shield for your batteries. It helps prevent accidents, ensures safe transport, and keeps your devices ready to go. Whether you're a traveler, drone pilot, photographer, or just someone with a drawer full of spare batteries--a battery bag can save you time, money, and stress.

<div class="df_qntext">Can I carry a spare battery on a plane?

If you are traveling with spare batteries, electronic cigarettes/vapes or back-up power supply (power banks) and most other portable electronic devices, you must carry them in your carry-on baggage and not checked baggage. Any spare batteries must be individually wrapped to prevent short circuit.

<div class="df_qntext">Should I buy a battery bag?

Buying a battery bag is only half the job. You need to use it correctly: Store Similar Batteries Together: Keep LiPo, Li-ion, NiMH batteries separated. Avoid Overfilling: Overcrowded bags can cause pressure damage. Check for Damage: Worn-out bags may lose fireproof properties. Label Your Batteries: Especially if traveling.

<div class="df_qntext">Can I put a battery in my checked luggage?

You can put a device with an installed lithium battery into your checked luggage if said device is fully powered off. Spare batteries are allowed only in carry-on items, and you must store them in their original packaging or cover their terminals with non-conductive tape.

You cannot pack battery packs, including lithium-ion batteries, power banks, and cell phone charging cases, in checked luggage. These items must go in carry-on baggage because they ...
